

# Time Series Analysis & *Forecasting* in Excel

# Accounts as % of Pipe Generation

The % of pipe generation that [redacted] makes up has reduced significantly this quarter. We want to determine if it's just a temporary fluctuation.

# 7-Month Moving Average Comparison & Forecast

Takes an average of 3 months (from 2018 to Apr 2024) or 1 month (from 2023 to Apr 2024) for pipe gen % to be greater than or equal to the 7-Month moving average. We can assume that the **2024-Mar** % of pipe gen will rise within the next 3 months.
